

NORTHEAST MINNEAPOLIS: "THE NEW ART OF NEIGHBORLY"

In Northeast, we celebrate our histories and artfully craft a welcoming future while collectively nurturing the health of our community.

COMMUNITY VISION STATEMENT

We celebrate our history, our institutions and the traditions of our cultures, families and friendships. We incorporate the arts into daily life as well as into our built environment, our celebrations, and education. We're more alike than different and commit to finding and building on commonalities while welcoming obvious and not so obvious differences. Individually and collectively, we make it comfortable for people to call this and make this their home by being *neighborly*. We give particular attention to our gateways and throughways, making them clean, safe and positively inviting, as these are the first and lasting impressions.

We recognize the strength that comes from working with our hands; the industrial working class heritage as well as the work of making our surroundings aesthetically pleasing. We nurture and trade on our assets to create a sustainable community while enriching and being enriched by the larger world.
